Benefits of cooperation:

Our goal is to find and offer for each customer reasonable solution leading to the reduction of lighting cost.

The most common is voltage control and replacement of standard lamps and lighting sources by efficient **LED** and **LVD** technology. However as a manufacturer of voltage regulators **REG** series we can offer much more including **monitoring and measuring** of electrical network and other related systems. We bring to our clients **savings up to 70%** and other **services**.

Complex solution:

DINO TRADING Ltd. has engaged the import, sale and installation of telecommunications and office equipment since its establishment two decades ago. Actively participated in the development and production of specific products. The company has a business license in the field of **production, installation and repair of electrical machinery and apparatus, electronic and telecommunications equipment** and our specialists hold a certificate for a revision of electrical equipment and designing according to §10 of Regulation 50/78 Sb. on qualification in electrical engineering. Several years ago we have focused on energy saving lighting and started selling and consequently producing our own voltage regulators. We have our own team for hardware and software development and that is why we are flexible and can adapt solutions according customers' demands and technical requirements. We offer our services mainly in the Czech and Slovak republic but thanks our trained partners we can provide installation, including complete lighting systems, also in other countries. Up to now we have supplied and installed more than 300 controllers and replaced the lighting in a number of premises in the Czech and Slovak Republic including 15 of Billa's stores.

DINO is a leading reseller of the **TESLA** brand (formerly Esolite) that covers LVD & LED wide assortment of branded light solutions.
